

# Wireless Connection in the Library

Questions: Please call library help desk at: (909) 448- 4089.

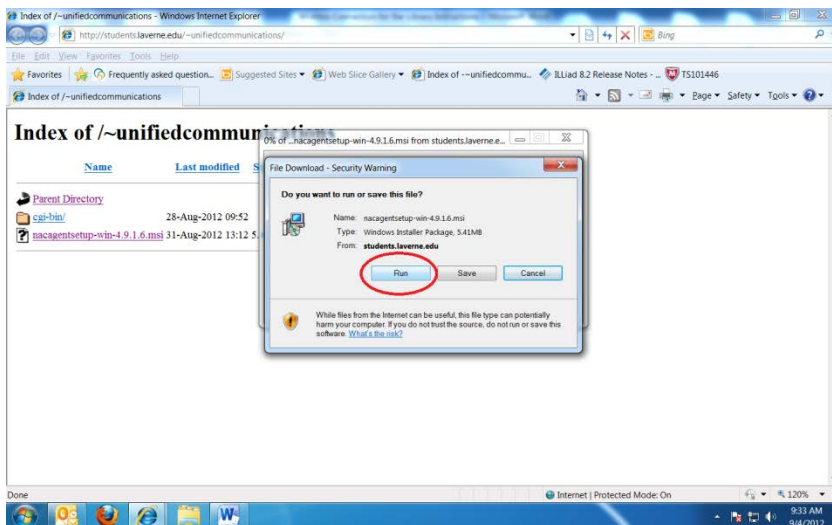

1. Click [here](#) to see if your anti-virus software is supported by Cisco or not.
2. If the antivirus software you have is not on the list, please download an antivirus software [here](#). Any of the following three are recommended: AVG Free 2013, Avast, or Microsoft security essentials
3. If your anti-virus software is on the list and the browser scan is not detecting it then you can try to install the Cisco NAC on your computer and log in through that. Download The Cisco NAC [here](#)

## Index of /~/unifiedcommunications

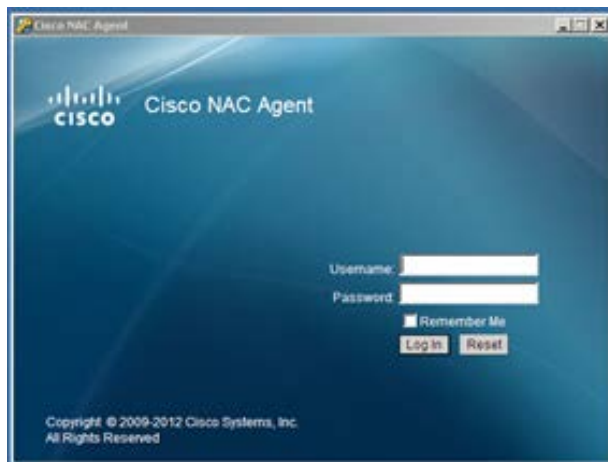

Name	Last modified	Size	Description
<a href="#">Parent Directory</a>			
<a href="#">cgi-bin/</a>	28-Aug-2012 09:52	-	
<a href="#">nacagentsetup-win-4.9.1.6.msi</a>	31-Aug-2012 13:12 5:4M		

Click on nacagentsetup-win-x.x.x.x.msi

4. Click on **Run** to install on your computer.

5. Once installation is complete, this window should pop up. Type in your username and password (Laverne email login: username is first.last name, password is whatever you have set for your La Verne email)

6. Your computer will now be scanned for compliance with the University network standards.

7. Once scan is done and all is okay this screen will appear, simply click on accept if you agree with the network usage policy. Then you should be able to connect to the Internet
